+45 52 25 13 37

LANGUAGES

Danish, native
English, fluent

FOCUS

React, TypeScript, UI
architecture
Data visualization and
developer tools
Full-stack product
delivery

SKILLS

TypeScript React
React Router Next.js
Node.js Tailwind CSS
D3 Git GitHub Actions
Vite / Bun DuckDB

Full-stack TypeScript/React developer building production-grade tools, data-heavy interfaces, and developer tooling. Maintains open-source software through Git Truck, with strong frontend architecture, visualization, Node.js integration, and MSc-level computer science experience.

EXPERIENCE

Open Source Maintainer, Git Truck

2022 — Present

TypeScript React React Router TailwindCSS D3 DuckDB Node.js
Bun Vite

- Lead developer and maintainer of Git Truck, an open-source developer tool for software visualization and Git repository analysis.
- Own the TypeScript/React architecture for contributor analysis, temporal filtering, repository exploration, and CLI-driven usage.
- Build data-heavy visualization workflows with D3 and DuckDB, with attention to performance, release quality, and UX for large repositories.
- Migrated from Remix v2 and styled-components to React Router v7, Tailwind CSS v4, Bun, Vite, and Node.js tooling, improving data loading, UI consistency, and contributor experience.

Software Developer, twoday IT Minds

2022 — 2023

TypeScript React .NET

- Worked as a software engineering consultant in agile client teams, building React/TypeScript tools for operational and advisory workflows.
- Built React/TypeScript internal tools, uptime dashboards, and operational interfaces for PensionDanmark, improving visibility into system status.
- Delivered frontend and full-stack features across dashboards, advisory tools, and backend integrations in close collaboration with client and cross-functional teams.

Software Developer, Dansk Drone Kompagni ApS

2016 — 2019

TypeScript React .NET

- Built full-stack B2B geospatial products with React and .NET for clients including Odense Letbane, covering mapping, reporting, and customer-facing workflows.
- Integrated serverless geospatial processing for map analysis, data exports, and PDF report generation.
- Owned product requirements, architecture choices, implementation, and release delivery in a startup environment.

EDUCATION

MSc Computer Science, IT University of Copenhagen  2023 — 2026

- Focused on software visualization, machine learning, and developer-facing tools.
- MSc thesis published at IEEE VISsOFT 2026.

BSc Software Development, IT University of Copenhagen  2019 — 2023

- Focused on software evolution, maintenance, DevOps, and application development.
- BSc thesis published at IEEE VISsOFT 2022.
